

**CURRENT SITUATION OF KOBAN'Ê AND EMERGENCY  
STRATEGIC OBJECTIVES REPORT.  
*SURUÇ MUNICIPALITY, TURKEY***

**November 2014**

Prepared by Narin Gezgör & Emel SEVGİ

## **BACKGROUND**

ISIS, which became a serious threat for people by attacking different religions, sects and ethnical identities, massacred thousands of people firstly in Shingal since August and afterwards in Kobani Canton of Rojava. Thousands of women and girls have been raped, sold on slave market; tens of people have died of starvation and thirstiness on migration way; hundreds of thousands people became stateless.

Since one and half months from the attacks of ISIS towards the Canton of Kobani in Rojava, more than 15.000 thousands of Kobani people came to Urfa.

15.000 of these people settled down in Birecik, 4000 in Siverek, 600 in Ceylanpınar, 3000 in Hilvan, and 12.000 in Bozova. The biggest number of migrants, 15.800 people, have been placed in the tent cities, villages and districts of Kobane, Arin Mirxan and Suphi Nejat which are coordinated by the Suruc Municipality. Only 6.120 people are living in Suruj-1 and Suruj-2 camps belonging to AFAD

As Municipality of SURUÇ, has taken part in the help actions for refugees, visited each joint life area, identified the needs and problems, shared the data's and informations with relevant persons, and done some correspondences concerning the situation in order to inform the national and international public opinion. For removing this unjust treatment as all dynamics in the region, our Union too, has shared its meal, bread, quilt, blanket, and taken part in all help activities.

While local governments were trying to solve the human drama and crisis in the cities of our region, government ignored the tragedy and left Shingal and Kobani people alone with their fate.

Therefore, the problem has come to a level that exceeds the means of local governments. It is very difficult to cure the wounds of such a huge mass of people. In order to maintain the services and face the needs, the help of regional and national unions, municipalities of Turkey, national and international organizations is seriously required.

In reason of coming winter, the shape of helps and needs has changed. The support of national and international organizations and institutions are urgently required to face the needs as containers, winter-proofed tents, canvas, blankets, beds, drugs, medical materials, ambulance, service cars, mobile kitchen and kitchen materials, mobile showers and toilets, cleaning and alimentary products, education materials, all kind of women and children materials, clothing (for winter), hot water supply systems, cars for handicapped people, power distribution unit, social equipment means, etc....

To remove the tragedy and victimization experienced by more than hundred thousand people, we call the international human help organizations, governments, local government's organizations to support the human help actions of municipalities of our region; and we inform the public opinion that sustainable help is needed.

Best Regards,

**Orhan Şansal-Zuhal Ekmez**

**Co-Presidents Municipality of Suruç**

## AGE DISTRIBUTION OF POPULATION EXCLUDING STREETS

## TENT CITIES

### ARÎN MÎRXAN TENT CITY

This tent city is established at right in the entrance of the Suruç city center from Aligör direction, containing 488 families and 3037 people. It contains 459 tents and 2 containers based on about 24 acres of terrain.

There is 456 small tents and 3 big tents:

440 tents - People from Kobanê are staying

4 tents - Used as storage

2 big tents - for the volunteers

1 small tent - for the teachers

1 small tent - for psycho-social working

2 big tents - for education (1 kindergarten and 1 normal)

8 big tents - for education (2 tents are joined to make a class)

1 big tent - for culture and art activity

1 container - for infirmary

1 container - for camp attendants

- ✓ Ground of the tent area is tried to be isolated by paving stone. Main arteriar road of the temporal settlement area is filled by stone chips in order to prevent from mud or similar negative effects of rain or snow. Palletizing and ground isolation (blanket on ground pallet) has done in all the tents.
- ✓ There exists luminaries in all the tents connected to a main transformer which is temporally settled. Hence, there is no electricity yet. Heating is one of the main problems which is a matter of urgency.
- ✓ There exists 20 toilets and 20 bathrooms in the camp area. Building of approximately 50 toilets and 25 bathrooms is still continuing. Moreover, 2 drinking fountain and a water tanker is on construction. A laundry has been settled.
- ✓ The sheltering equipment (bed, cushion, blanket and etc.) that is used by the people who have to stay in this temporarily settlement area is organized by *Center for charity collection and distribution of Suruç Municipality*, but it is not sufficient. In these days, the winter conditions are becoming more current and it is a matter of urgency of the reinforcement of sufficient amount of sheltering equipment.
- ✓ The breakfast is organized by the Urfa Metropolitan Municipality as servicing soup. Lunch and dinner is organized by Kızılay [Turkish Red Crescent]. It is seen that this service is insufficient and does not satisfy the need. The interviews with the camp dwellers shows that they are tired of the timing problem of the breakfasts and the soup

as the only meal. The types of the meals should be increased as a normal breakfast including eggs, cheese, olives, molasses and etc.

- ✓ The health problems are tried to be solved by a voluntary group belonging to SES [Health Workers Union]. Hence, this voluntary medical activity must turn into *Family Practice* system. Children should be enter into checkup process, and measures should be taken immediately against epidemic. Against the cold weather, newborn babies need cradle and the need for *baby food* is also current.
- ✓ Educational practices for the children who are at the school age has not started yet.

## **SUPHI NEJAT AĞIRNASLI TENT CITY**

- ✓ This tent city is settled in the area of Bulgur Factory in approximately 10 arches of terrain at the entrance of Suruç city center, containing 170 families and 1100 people. There exists 85 tents: 45 of them are settled inside the warehouse in the factory area, and 40 of them are in the open area. By being inside the factory area, the tent area is covered by walls and this makes the conditions appropriate for preservation and security. Hence, for being stuffy and for the roofs are not repaired, the health problems are seriously increasing.
- ✓ The ground of all the tents have a isolation with wooden parquets. The ground of the open area is concrete which was made before. There is no ground isolation in the concrete ground. The whole ground that is made of the wooden parquet also needs to be covered by carpet.
- ✓ There are 16 toilets and 16 bathrooms in this tent city.
- ✓ The sheltering equipment (bed, cushion, blanket and etc.) is organized by the charity center of the Municipality of Suruç. Hence, it is not sufficient, and especially cushion is needed.
- ✓ Urfa Metropolitan Municipality organizes the breakfast in this tent city. The problems in other tent cities are also seen at this tent city. Baby food and other supplement food is needed.
- ✓ There exists and area for the use as the infirmary.
- ✓ There exists 482 children who are at the age of school, but there is no infrastructure for any educational practice. There are tents for educational purposes, but the other technical stuff is still lacking.
- ✓ Activity and initiative of Eğitim-Sen [Education and Science Workers Union] also exists in this tent city. Moreover, teachers including the ones coming from Kobanê is sufficient for any teaching and schooling purposes.

## **ROJAVA TENT CITY**

- ✓ In Rojava Tent City with a population of 1100, there are 110 tents for 220 families. The campground where located next to Suphi Nejat Ağırnaslı Tent City, established on 12 acres of terrain.
- ✓ The ground of the camp area is not levelled by pallets. The pallets and blankets are needed immediately. Stone chips cover the main arterial road.
- ✓ The light is provided with a projector from the Bulgur Factory. For establishing the electrical infrastructure, there needs to get some supplies immediately.
- ✓ The habitants of the camp are using public bath provided free by the municipality. 24 toilets, 16 bathrooms are set up by the municipality and the nongovernmental organizations. The infrastructure works are in progress.

- ✓ Center for charity collection and distribution organized by Suruç Municipality provides beds, cushions and blankets. Due to the winter conditions, some supplies such as quilts and blankets must be reinforced immediately.
- ✓ One of the most important troubles of this area is the education for 560 school age children. There is no educational infrastructure for children. However, very few children can be able to continue their education thanks to individual volunteer teachers' efforts. In an educational tent named Ehmedê Xanî, children can partially continue their education. In this educational tent, there are 5-6 teachers from Rojava. They are teaching approximately 200 children. Children from age 3 to 5 are going to kindergarten; from age 5 to 10 are going to school. This educational tent also needs pallets, immediately.

### **KOBANÊ TENT CITY**

- ✓ In Kobanê Tent City established on 16 acres of terrain with a population of 1471, there are 257 families.
- ✓ Wooden pallets isolate the tents in the camps and the stone chips cover the main arterial road. There are light fitting in every tent. Heater cores are distributed to each tent. But the infrastructure is not enough for heating; so, there will be needed to build electrical infrastructure immediately for winter conditions.
- ✓ 211 tents and 10 stores are using for sheltering.
- ✓ Center for charity collection and distribution organized by Suruç Municipality provides beds, cushions and blankets. Due to the winter conditions, some supplies such as quilts and blankets must be reinforced immediately.
- ✓ There are 8 toilets and 3 bathrooms in the camp and 3 containers, 24 toilets and 12 bathrooms will be built. There is no community kitchen or laundry facilities.
- ✓ An educational tent named Viyan Amara was set up. Basic school education is provided for young children in this tent; but it is quite insufficient for one thousand school age children. So, an additional educational area and pallets for the present educational tent are needed.

### **5- NEW TENT CITY**

- ✓ In this tent city, there are 382 tents. Federated Kurdish Parliament provided 260 of them. This tent city is situated cross to the sports complex in the center of Suruç. The process of setting up tents is still in progress on these 20 acres of terrain.
- ✓ The terrain has very good conditions for tent city. The area of this camp, where 500 tents can be placed, was already prepared. The working on floor isolation with wooden pallets and on interior isolation with nonflammable materials are in progress. A radiator is distributed to every tent. Hence, the infrastructure for electricity is insufficient. Thus, there should be a work on the infrastructure.
- ✓ It is planned to build a school, a playground and a tent for social activities next to the area where the tents are set up.
- ✓ It is also planned to set up one container for attendants of the tent city, 40 toilets, 40 bathrooms, 30-ton water tank and a supply room. It is needed to build 135 toilets and 45 bathrooms. Electric and wood heaters will occur water heater system. In five different locations, there will be drinking water faucets. 4 water tanks with 10-ton capacity are under construction.

## **EMERGENCY TARGETS**

### **1. Priority :To provide 2 Portable Health Center**

Portable Health Center is one of the urgent needs for refugees who maintain their life in the places mentioned above. The health needs of refugees who live in the separate places are met by the Suruç Municipality at the Amara Cultural Centre. (in suruç) Doctors came from Koban'ê and other serve willingly here and also drugs are delivered here. But this is carried out with difficulties. Therefore, a fully equipped Portable Health Center is needed.

Two Portable Health Centers should be accompanied by the emergency needs listed below:

- 1-Dressing Materials
- 2-Portable oxygen gas cylinder
- 3-Surgical intervention set
- 4-Tent for emergency and disaster
- 5-Mobile health vehicle
- 6-Mobile field hospital
- 7-Ear-nose-throat unit
- 8-Optometrists unit
- 9-Dental unit
- 10-Clinic's modules
- 11-Surgery modules
- 12-Reanimation-blood bank
- 13-Automatic ventilator
- 14-Mobile x-ray
- 15-Surgery modules
- 16-Armored vehicles for conflict zone first aid
- 17-Radyology and x-ray unit

***Note:*** We need technical support to prepare the project's detail and budget.

## **2.Priortiy : To make 4 Portable Schools for 4-8 months**

### **Project of Summary**

<b>Project title:</b>	KOBANE'S CHILDREN
<b>Project short description :</b>	<p>Kobane's Children Project aims to create a living conditions ground for children, who are affected from war and migration and have been deprived from the education opportunity, but need tp get an education and to live with human dignity in the community thanks to include them in the educational process by the building temporary and emergency prefabricated schools</p> <p>This project will lead children to get an education which is oriented to protect mental, physical and spiritual health of children and keeps children a little bit away from difficult living conditions until a permanent and effective solution strategy is developed.</p> <p>Kobane's Children Project will contribute without any doubt to improve living quality conditions and development of educational rights of the migrated children in Turkey.</p>
<b>Project motivation (Objectives):</b>	<p>According to the survey results of Şanlıurfa Eğitim-Sen, we as municipality identified 245 children in the age of 7-14 in the tent village Kobane, 246 children in the tent village Rojava and 250 children in the AFAD 1. Zone. It has been observed that most of the children have been experiencing seriously war and migration trauma. Most of them are struggling for their life with their families broken off their schools and teachers. It has been identified that one part of those children gets educated in Kobane in own mother tongue whilst other major part of them in Arabic.</p> <p>According to the information of teachers coming from Kobane, even if those children return to Kobane new education-teaching curriculum will be in Kurdish. Therefore, starting new school children specifically will continue their education in Kurdish even if they return to Kobane.</p> <p>Based on all of these reasons, collaboration of Mardin Artuklu University Institute of Living Languages and Branch of Şanlıurfa EĞİTİM-SEN</p> <p>Our main targets for children:</p> <ul style="list-style-type: none"><li>• On the area of 4 tent cities there will be established 4 pre-school education schools with 2 classes and 1 toilet. 4 prefabricated primary</li></ul>

	<p>schools will be founded</p> <ul style="list-style-type: none"> <li>• In every tent city there will be established 4 prefabrikated cultural centers.</li> <li>• Offering rehabilitative and educational lessons like mathematics, life science, Kurdish, Turkish, Music, Drama and physical education for circa 1000 primary school level children in own mother tongue Kurdish,</li> <li>• Keeping Kobane's Children in touch with their educational life,</li> <li>• Supporting the teachers coming from Kobane to perform their professions again.</li> <li>• Keeping children away from war and chaos as well as rehabilitating and guiding them by means of this temporary school.</li> <li>• Keeping children away from heavy work and dangers all the time facing outside of school.</li> </ul>
<b>Project target groups:</b>	<ul style="list-style-type: none"> <li>• 245 children in the age of 5-11years living in the tent village Rojava,</li> <li>• 246 children in the age of 5-11years living in the tent village Kobane</li> <li>• 250 children in the age of 5-11years living in the tent village AFAD,</li> <li>• 300 children in the age of 5-11years living in the tent village Arin Mirxan.</li> </ul>
<b>Project duration:</b>	8 months
<b>Project implementation venue: (City, Town, Village)</b>	Municipality of Şanlıurfa Suruç
<b>Scheduled organisations for the project collaboration:</b>	<ul style="list-style-type: none"> <li>• Mardin Artuklu University Institute of Living Languages</li> <li>• Branch of Şanlıurfa EĞİTİM-SEN</li> </ul>
<b>How to ensure the continuity of the project? (Continuity/Sustainability)</b>	<p>The schools and cultural centers which have been founded in the tent cities will be moved to the area which is planned as city of Kobane with 40.000 inhabitants.</p> <p>The continuity of the project might be changed for the refugees in case of their return to Kobane depending on the situation there. However, we will be able to ensure the continuity of or education project either way since we assume that most of the refugees from Kobane will settle down in Suruc. Even the children would return to Kobane, they will continue their education there. By this project, in case of they would stay in Suruc, the education in Kurdish and Turkish will build a foundation. Depending on the refugee rights, even if any education policy wouldn't be offered for those children, we as municipality are planning to continue</p>

	long term educational support.
<b>Total project costs : (Detailed)</b>	8 prefabricated schools( each 2 classrooms, 1 washbasin) 15000 X8=120.000 4 Prefabricated Center of Culture =15000x4 =60.000 = 1 Each 100 school seats =100 seats X100 turkisj lira X 8school =40000 = Monthly salary for 4 Teachers =1000X8X4=32.000 5000 children educational material =5000x15 =75.000
<b>Amount of the funding requested : (Detailed)</b>	357.000 Turkish lira
<b>Requester's contribution to the project: (in kind or cash)</b>	<ul style="list-style-type: none"> <li>• The contribution of Şanlıurfa Eğitim-Sen to the project; 6 voluntary teachers.</li> <li>• Mardin Artuklu University Institute of Living Languages will prepare the text and reading books as well as related materials.</li> <li>• Expenses which will be funding by the municipality of Suruc: <ul style="list-style-type: none"> <li>-Expenses for children's nutrition/food</li> <li>-Pre-school educational materials</li> <li>-Project coordinator</li> </ul> </li> </ul> <p>Also other necessary materials for the schools will be sponsored by us.</p>

NOTE ;Having created the prefabricated houses in the Koban'ê, the portable schools will be transfered to the area that prefabricated houses are in.

### **3. PRIORITY ; To create the Kobanê City with 10000 sustainable houses that are able to accomodate 60.000 people.**

3.1. The general project aim: It is openly visible, that the

Because of the current war a lot of people from Kobane have to leave their homeplaces and especially settle down in the center of Suruc as well as in the districts, villages of the province, and the tent city areas belonging to Suruc municipality. The problems of these people are growing each day and its clearly visible that especially the coming winter will confront them with even bigger problems.

The Kobane people should be minimal affected by the coming winter conditions, and therefore one of the fundamental purposes by Suruc municipality is to found a new "Kobane Container City".

- To create some more confidential, hygienic , eligible shelters to the family because of harsh winter.
- To provide refugees who are forced to leave their cities not to breaking away from each other and to unite them in a common area.
- To create a Prefabricated-Permanent Health Center and give to the doctor who came from Koban'ê the opportunity of working at this health center.
- To prove children a common playground and keep them going on their education with their mother tongues.
- To create them a autonomous , democratic habitat and dynamize the power of the local government.
- To help to the Civil Society and etc Organizations to deliever their aids easily and safely.

#### **THE FEATURES OF SUSTAINABLE HOUSES**

- The "Container City" witihn the Suruc Center 500.000m<sup>2</sup> treasure land will be used.
- The houses should be organized in accordance with the climate condition of Suruç.
- Field arrangement (regulation) will be made by the municipality of Suruc
- Each house should be with 2 rooms, 1 kitchen, 1 bath and 1 bathroom.
- Sanatary sewage and drinking water line will be made by DİSKİ
- Within an area of 27 m<sup>2</sup> 8000 containers will be placed.
- It will be provided a lightening for the area
- With a capacity of 5 persons per container, there will be provided shelter for 40.000 people altogether.
- Within the container city there will be founded 8 prefabric schools with an area of 100m<sup>2</sup> for each school
- Within the container city there will be founded 4 prefabric cultural centers with an area of 100m<sup>2</sup> for each center

- Within the container city there will be established a sufficient number of “Children Playgrounds”
- Within the camps each day there will be served three meals
- Within each container house there will be provided sun energy
